PROFIL

D4 Informatics Engineering student at Universitas Logistik dan Bisnis Internasional (ULBI) with a GPA of 3.43/4.00. Passionate about building scalable web and mobile applications, with hands-on experience developing MANBIG an enterprise warehouse management and POS system and SafeRoute, a road safety hazard reporting mobile application. Proficient in Go (Golang), Dart, JavaScript/TypeScript, React.js, Flutter, and cloud technologies including Firebase and MongoDB.

PROJECTS

MANBIG - Enterprise Warehouse, POS & Logistics System

- Full-Stack Developer | Enterprise Warehouse, POS & Logistics Platform Engineered an end-to-end management platform using React 19, Go (Fiber), and MongoDB, featuring 4-role RBAC, high-throughput POS checkout, and live inventory sync. Integrated driver dispatch tracking with GPS coordinates and automated periodic exports of financial and stock audit logs via Excelize, optimizing warehouse operations and retail checkout workflows.

SafeRoute - Smart Road Safety & Hazard Reporting App

- Engineered a real-time road safety mobile app with Flutter and Firebase, featuring instant photo reporting with auto-detected GPS tagging, interactive OpenStreetMap hazard clustering, direct Google Maps turn-by-turn navigation, and QR code sharing for rapid incident tracking and emergency safe point navigation.

PENDIDIKAN

- SMK NEGERI 11 BANDUNG (Rekayasa Perangkat Lunak) 2020-2023
- UNIVERSITAS LOGISTIK DAN BISNIS INTERNASIONAL (Teknik Informatika) 2023 - now

SKILLS

- ProgrammingLanguages: JavaScript,Go
- Frameworks&Libraries: React.js,Next.js, Express.js, Tailwind CSS, Go Fiber.
- Databases: MongoDB
- Tools: Git, GitHub, Vercel

CERTIFICATIONS

ORACLE ACADEMY

- Database Programming with SQL
- Database Design
